YEABTSEGA TOLERA

Software Engineering Student

PROFESSIONAL SUMMARY

Computer Science student at Hawassa University and founder of **yabuxd**, building full-stack web applications with a focus on clean design and user experience. Proficient in React, Next.js, and MongoDB with a solid foundation in Java and C++. Passionate about developing practical, user-focused products from concept to deployment. Seeking opportunities to contribute to innovative engineering teams.

PROJECTS

School Management SaaS Platform

yabuxd | Next.js, React, MongoDB

- Architected a multi-tenant SaaS platform enabling schools to register and independently manage their own websites and administrative data
- Designed isolated environments ensuring each institution operates independently with secure data separation
- Developed full-stack solution using Next.js and React for the frontend with MongoDB for scalable data persistence

MovieXD — Movie Streaming Platform

yabuxd | React, JavaScript, REST APIs

- Built a responsive movie streaming interface with dynamic content browsing, search, and detailed movie information pages
- Integrated third-party movie APIs to fetch real-time data including ratings, trailers, cast information, and release dates
- Designed an immersive, Netflix-inspired UI with dark theme, smooth transitions, and mobile-first responsive layout
- Implemented user-friendly navigation with category filtering, watchlist functionality, and personalized recommendations

EDUCATION

Hawassa University

Bachelor of Science in Computer Science | Expected Graduation: 2027

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Software Engineering
